

JIT SOLUTIONS

1st Quarter - 2009

Celebrating 25 years in business.

Antique Mirrors – A New Trend for Architectural Applications...

JIT Companies, Inc. has been fabricating glass to fit architectural designs for 25 years. JIT Companies, Inc. recently broadened their product offerings to include antique mirror. JIT can employ most all of their glass fabricating techniques to achieve the desired result of the designer including: beveling, laminating, and water jet cutting. The application possibilities are limitless, but might include cabinet inserts, an element of leaded glass cabinet inserts, table top, mirrored wall - applications or other furniture elements. All of these can be achieved with antique mirror and our custom fabrication methods.

By partnering with JIT you can introduce these unique mirrors into your product line or distinctive design project. The mirror patterns are hand crafted using proprietary silvering techniques and are an elegant alternative to clear mirrors.

Product details:

- Handcrafted, silvering techniques
- Nine distinctive patterns
- 1/8" and 1/4" inch thickness (Note: laminating to other glass to achieve thicker specifications)
- All patterns are available with Gold Vein overlay
- Custom laminated to conform to safety requirements
- Achieve any shape utilizing water jet cutting technology
- Beveled and flat edge polishing services are available

Sharpening Our Pencils, Too!

During this unsteady economic climate we understand that maintaining open communications and building trust are vital for the preservation of our relationships with our customers, as well as our vendors. As a job shop, quoting and estimating have always been a collaborative process, here at JIT. However, we want you to know that you can depend on us to give you our most competitive price. We will also maintain our short lead times along with our quality of products

and service.

We welcome the opportunity to provide a quote for your designs and drawings. We are prepared to partner with you on a first time quote or to be your back up supplier in the event you lose your current supplier.

We encourage you to come and talk to us and to keep the lines of communication open. Depending on each other is the key to emerging from this economic uncertainty.

Partnering to Match Highest Level of Quality and Service

Emerald Ironworks Inc. has been fabricating most anything of metal for the past 28 years. However, high quality driveway gate systems and railings of distinction are the focus of the company.

Emerald Ironworks Inc. is prepared to employ what ever fabricating technique is best suited to achieve the desired result of their client. They have a well equipped fabrication shop that can handle most any technique that is required. However, sometimes the desired result requires water jet cutting, a tool that is not included in the fabrication shop.

When Emerald Ironworks Inc. partners with another company they have to ensure that the quality of the part and service matches their own. JIT Companies, Inc. and their water jet cutting services are just the right fit.

Like Emerald, JIT Companies, Inc. has the ability to understand the design concepts, the interdependence of the component they are cutting and how it fits into the overall gate or railing system. JIT Companies realizes that Emerald Ironworks is quoting contractors and architects and, like Emerald, JIT can review blue prints and bid from CAD drawings and designs.

JIT Companies, Inc. understands what it takes to make Emerald Ironworks look good in the eyes of their client. At JIT Companies, Inc. we always strive to attain that recognition for our clients.

"JIT offered expert assistance and execution of a complicated project. Bob Pflipsen not only did exactly what I asked, he went above and beyond by taking a vested interest in the project, strategizing ways to do things better and more efficiently, and ensuring it was a success. There are a lot of water-jet companies out there, but at the end of the day it, in large part, comes down to the people and the service. That's why I choose JIT."

More About JIT Companies Inc.

JIT Companies Inc. fabricates unique projects and custom parts for design professionals, specialty contractors and a broad range of manufacturers. We focus on challenging, short-run projects that require high quality outcomes. Our capabilities include custom waterjet cutting services and made-to-order glass fabrications for both architectural and industrial applications.

We process all types of metal, glass, stone, foam, plastics and laminates. We smoothly integrate into your production cycle to reduce your production costs and overall time-to-market. We have had experience with many different materials, techniques and technological changes. It has always been our mission to maintain Old World quality, even as we introduce New World technology into our fabrications.

For twenty-five years, we have provided innovative solutions to the likes of Goodrich Corporation, Hutchinson Technology, Medallion Cabinetry, and The Science Museum of Minnesota; to name a few. We have succeeded in coming up with solutions when others have said that it could not be done; let our experience be your guide.

Mission Statement

"Blending your designs with our experience, innovation and technology to create custom solutions."
